

**COMPUTER IMPLEMENTED METHOD OF MANAGING INFORMATION
DISCLOSURE STATEMENTS**

ABSTRACT OF THE DISCLOSURE

In one embodiment, a computer implemented method of managing invention disclosure statements comprises storing a plurality of first electronic documents on the server system, the plurality of first electronic documents containing reference information to be disclosed to a patent office. A second electronic document containing citation information may be received on the server system from a patent office. The citation information in the second electronic document is displayed to a user in a first display section, and a plurality of identifiers and one or more input select elements are displayed in a second display section. The user may enter information into the server system using the input select elements, and the information corresponds to the relation between the displayed citation information and the displayed plurality of identifiers.
